## Professional Summary

A determined Web 3 and Blockchain developer with 3+ years of experience specializing in Solidity and Ethereum based solutions. With corporate experience and leadership skills over pragmatic Devops and microservices development in Web 3 architecture, I have worked with outsourcing agents and freelance clients previously. Recently, at the role of Blockchain lead at UAE based company. Worked in projects focusing over blockchain wallet payments and transportation based blockchain solutions. Strong auditing skills in Smart Contracts (Solidity, Rust). Familiar with recent updates and trends in blockchain deployment and packages.

## Highlights

- Focus and Follow-Through for ERC Solutions
- Stack Development
- Decentralized Applications And Web 3.0
- Scheduling and Coordinating
- Co-operation and Leadership
- Related Technical Skills
- Administration and Reporting

## Experience

### Blockchain Lead, The Nork Incorporated, Silicon Arch, UAE

(Remote)

May 2022-August 2022

- Discussed and planned systems with solution architects,system engineers.
- Designed and developed blockchain transportation based Dapp solutions/
- Created and developed inhouse defi wallet payment gateways.
- Worked on smart contract and liquidity pool.
- Evaluated blockchain processes and risks based on security assessments and control matrix reviews

## **Ethereum Open Source Contributor August 2021**

- Contributed for Ethereum L-2 level solution description on mainsite via Github

## **Transcriber/Media Assistant-ViewFinders Production March 2021-July 2021**

- Listened to speaker's statements to determine meanings and prepare translations, using electronic licensing systems as necessary
- Used digital media apps to organize and manage video transitions.

## **Freelancer-Blockchain Development November 2018-April 2022**

- Developed 8+ Dapps and 1 EVM based applications
- Worked on smart contract auditing
- Developed NFT pools and yield farms
- Developed geolocation based blockchain Dapp

## **Languages And Technical Skills**

- Solidity
- Rust
- NodeJs
- Electron and React App
- Firebase Hosting and Database
- Cpanel and Webmail
- Ethers.Js, Web3.js, Hardhat
- Ganache, Vite, TruffleJS

## **Additional Projects**

### **2022**

#### **Archie Neko Yield Application**— DAPP Solution

Created ERC20 based Web3 Solution and deployed at

<https://app.archieneko.com/>

<https://github.com/AayushCurious/Archie-Neko>

#### **Stepn Geolocation Prototype**— Geolocation Application

Collaborated with dev team to create smart contracts based

Geolocation Application Stepn

<https://app.archieneko.com/>

<https://github.com/AayushCurious/stepn-demo>

### **2021**

#### **Hackathon Solution**— NASA SpaceApps 2021

Developed, launched and presented Hackathon Solution on Mission Challenge

“Unlocking The Secrets Of Sun”

<https://2021.spaceappschallenge.org/challenges/statements/unlocking-the-secrets-of-the-sun/teams/free-thinkers-1/project>

#### **Open Source Contribution**—Ethereum

Submitted code reviews and worked for translations on Ethereum mainsite via CrowdIn and Github

### **2020**

#### **Hackathon Solution**-NASA SpaceApps 2020

Developed and launched solution on Mission Challenge “Digital History Of Earth”

<https://2020.spaceappschallenge.org/challenges/inform/mission-planet-earth-digital-history/teams/space-wizards/project>
